Capital ratio and Regulatory requirements

Capital ratio

Regulatory requirements as of December 2022⁽³⁾

(1) The raise of the capital ratio is mainly due to the ban of dividends decided by the ECB. The forecasted dividend at the end of 2020 was limited to €69 million in accordance with recommendations from the ECB on dividend payments

(2) CET1 equity has increased by 340MEuro as a consequence of downsized EL/Prov shortfall and additional net result 700MEuro, which is partially offset by projected dividend payment in the amount of €600M. Change in Risk Exposure Amount (RWEA (Credit risk)+ CVA + Market risk + Operational risk) (+3.010 MEuro) results from the introduction of Market risk (Structural FX) in the amount of 1.003MEuro and increase of Credit risk RWA related to increasing on-balance and off-balance exposure.

(3) Countercyclical Buffer expected to increase to 0,53% in December 2023

Penetration rate

/ Financing penetration rate at **44.8%⁽¹⁾** (- 1.2 pts vs. 2021).

- Renault : 44,9% ⁽¹⁾
- Dacia : 47,3% ⁽¹⁾
- Nissan: 39,9% ⁽¹⁾

● RCI Financing Penetration rate ⁽¹⁾
